Bridging

means to us, to explore the existential way to give shape to separation and connection as natural forces of life. Throughout history, these forces have been expressed in different ways. In today's world, division and polarization seems to prevail. On the other hand, the need and longing to unify is a strongly felt exigency. During this week, we will explore these ambivalences, effects and observations in our working field and share concepts of bridging, approaches of integration and experiences of connecting.
